CAREER OBJECTIVE

Final-year Computer Science student with a strong foundation in full-stack web development and problem-solving. Proficient in MERN stack (MongoDB, Express.js, React.js, Node.js) and JavaScript (ES6+), with experience building scalable web applications. Skilled in developing REST APIs, implementing JWT authentication, and deploying applications on cloud platforms (Vercel, Render). Strong problem-solving foundation with 500+ DSA problems solved. Seeking Full-Stack Developer internship to contribute to user-centric applications.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Lloyd Institute of Engineering & Technology (LIET), Greater Noida

Expected Graduation: 2027

CGPA: 7.43/10

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, CRUD Operations

Programming Languages: C, C++ , JavaScript

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Render

Additional: JSON, Problem-Solving, Data Structures & Algorithms, Agile Collaboration

PROJECTS

SkillBridge AI - skillbridge-ai-abhi0605.vercel.app

- Full-stack web app that analyzes resumes against job descriptions, generating an ATS compatibility score and AI-driven skill-gap recommendations to help users improve job applications.
- **Tech Stack:** React, Vite, Node.js, Express, MongoDB, JWT/Google OAuth, Ollama/Groq (AI), Tailwind CSS.
- **Key Features:** Owned the project end-to-end — schema design, REST API, AI pipeline integration, and responsive UI — from local development through live production deployment on Vercel and Render.

FinBot AI - @finbot_abhi0605_bot

- Developed full-stack Telegram bot enabling users to track expenses, manage budgets, and receive financial insights through natural language conversation; deployed to production on Render with persistent MongoDB storage.
 - **Tech Stack:** Node.js, Express.js, Telegraf.js, MongoDB Atlas, Tesseract.js (OCR), Axios, Git. Architecture: Microservices with deployment on cloud platforms.
 - **Key Features:** Natural language expense logging, receipt OCR extraction, AI-powered affordability analysis, weekly spending insights, monthly financial reports, 50-30-20 budget planning, recurring bill reminders, microservices architecture
-

ACHIEVEMENTS

- **Google Student Ambassador**, engaging students through technical sessions and community events.
- **2★ CodeChef Programmer**, demonstrating strong problem-solving and competitive programming skills.
- Solved 500+ **DSA problems** across LeetCode and CodeChef.
- Active member of **HexClan Technical Club (Co-Convener)**, contributing to technical events and coding initiatives.
